Profile Summary

Full Stack Developer skilled in React.js, Python, Django REST Framework, and MySQL, with hands-on experience building scalable web applications. Experienced in developing AI-powered solutions, REST APIs, and responsive user interfaces with a strong focus on clean and efficient development.

Education

Dr. A. P. J. Abdul Kalam Technical University 8.2 CGPA
B.Tech.- Information Technology *Aug. 2023 – May 2027*

Experience

Full-Stack Developer(Freelance) June-2026- Present

- Developed responsive and reusable frontend interfaces using **React.js**, focusing on component-based architecture, responsive design, React Router navigation, form handling, and REST API integration.
- Built and integrated backend functionality using **Python and Django/Django REST Framework**, developing REST APIs and connecting frontend components with server-side data and application logic.
- Worked with **MySQL** for database-driven functionality, including API-to-database integration, data handling, testing with Postman, and debugging issues across the full-stack application.

Projects

Path2Hire - AI Resume Analyzer || React.js, DRF, Python, Gemini API, MySQL

- Developed a full-stack AI-powered resume analyzer with a 5+ stage pipeline.
- Built an ATS evaluation engine across 4+ dimensions, generating an overall ATS score with actionable feedback.
- Integrated Google Gemini API + rule-based analysis to provide recruiter-style recommendations, identify missing skills, and present responsive dashboard with score visualizations and skill-gap analysis.

DomainSentry - Lookalike Domain and Phishing Detection || JS, Extension APIs, ML, DRF, MySQL

- Developed a browser-based security extension that analyzes URLs, domain patterns to detect phishing and malicious websites in real time.
- Implemented URL feature extraction, domain similarity, suspicious keywords, and explainable risk scoring, with a machine-learning classifier using Python, Pandas, NumPy, and Scikit-learn.
- Developed a Django REST Framework + MySQL backend for threat scores, user reports, scan history, integrated with a Chrome extension for real-time security alerts.

Technical Skills

Programming Languages: Python, JavaScript, C, C++, SQL
Frontend Technologies: React.js, HTML5, CSS3, Tailwind CSS, Bootstrap
Backend & Database: Django, Django REST Framework, Flask, REST APIs, MySQL, SQLite
AI: Gemini API, LLM API Integration, Prompt Engineering, Generative AI
ML/Data: Scikit-learn, Pandas, NumPy
Tools & Platforms: Git, Github, Postman, Jupyter Notebook
Core Subjects: DBMS, Operating Systems, Computer Networks, Object-Oriented Programming

Achievements

- Solved **500+** DSA problems across LeetCode, GFG and Hackerrank.
- Achieved **Rank 1033** in a National-Level Coding Contest conducted by Naukri.com.
- Secured **Rank 10** in an Inter-College Hackathon, competing against teams from multiple institutions.
- Earned a **5-Star Rating** in Problem Solving on HackerRank.
- Contributed to **SWOC, ECWOC** as an Open Source Contributor (RANK-144 in SWOC) [Certificate].
